First Aid

Inhalation: Relocate patient to a source of fresh air and do not return to affected area. Consult a physician if symptoms persist. In case of unconsciousness, immediately contact emergency medical services.

Skin: Wash affected skin with water and soap and rinse thoroughly. Remove any clothing contaminated by the product. If irritation continues, consult a physician.

Eye contact: Remove contact lenses if they are worn. Rinse affected eye for several minutes with clean water while keeping eye open. If symptoms persist, consult a physician.

Swallowing: Do not induce vomiting. Call for emergency medical services. Swish with clean water, then spit out contaminated water; repeat this several times. Then immediately start drinking clean water, keep sipping water until emergency services arrive.

Fire and Explosion Data

Extinguishing Media: Use fire extinguishing methods suitable to surrounding conditions.

Fire/Explosion Hazards: Toxic gas could result from the curing process, heating process or in the case of fire.

Handling, Storage & Accidental Release

Handling precautions: Ensure good ventilation/exhaustion at the workplace.

Storage precautions: Store in sealed containers. Store separately from any oxidizing agents or acids. Store in a separate area from foodstuffs.

Environmental precautions: Do not allow to enter any water system.

Methods and material for containment and cleaning up:

Absorb with appropriate non-combustible liquid-binding material such as sawdust, collect mechanically. Then, ensure proper disposal of contaminated materials.

Exposure Control/Personal Protection

General protective and hygienic measures: Keep resin, hardener and mixing materials away from foodstuffs. Wash hands after handling and at the end of work. Avoid contact with the eyes and skin.

Respirators: To account for insufficient ventilation, always use a respiratory protective device when handling the product.

Gloves: Always wear gloves to protect the skin on your hands. Ensure that glove material is impermeable to the product, solvents and any other materials being utilized.

Eye protection: Wear goggles when working with airborne product.
